ENVIRONMENTAL & SOCIAL IMPACT ASSESSMENT (ESIA) & PERMITTING

SUPPORTING RESPONSIBLE PROJECT DEVELOPMENT THROUGH STRUCTURED ENVIRONMENTAL ASSESSMENT, REGULATORY COORDINATION, AND PRACTICAL ENVIRONMENTAL PLANNING.

OVERVIEW

Many environmental and social risks associated with new projects remain unnoticed due to the lack of thorough assessments and the complexity of ESIA technical documentation, which project owners often find difficult to understand and implement without assistance from environmental specialists.

We deliver comprehensive Environmental and Social Impact Assessment (ESIA) and permitting services for new developments, project expansions, and operational modifications.

Our services are structured to support environmental compliance, regulatory approvals, environmental planning, and informed project decision-making while aligning with applicable Egyptian regulations and internationally recognized environmental frameworks.

At EcoDynamix, we help transform complex environmental requirements into practical, structured systems that support clearer environmental planning, stronger regulatory coordination, and more effective environmental decision-making throughout project lifecycles.

WHAT WE DELIVER

- Project screening and environmental scoping.
- Environmental and social baseling studies.
- Environmental impact assessment and modelling.
- Environmental mitigation planning.
- Stakeholder and consultation support.
- Development of ESMPs and environmental management plans.
- Environmental approval documentation and submissions.
- Regulatory coordination and follow-up.
- Environmental permitting and approval support.

OUR APPROACH

We focus on practical environmental planning, regulatory alignment, and implementation-focused environmental management.

Each assessment system is designed to:

- Support environmental compliance.
- Improve project environmental planning.
- Strengthen environmental risk evaluation.
- Support sustainable project development.
- Improve coordination throughout approval processes.

HOW IT HELPS

- Supports environmental approvals and permitting processes.
- Improves environmental planning and project readiness.
- Strengthens environmental risk management.
- Enhance3s regulatory coordination and compliance.
- Supports responsible and sustainable project execution.

REGULATORY & INTERNATIONAL ALIGNMENT

We work in alignment with Egyptian Environmental Regulations, IFC Performance Standards, World Bank Environmental & Social Framework, and international lender and due diligence requirements.
